	A waterproof portable logging multiparameter meter that monitors up to 12 different water quality parameters.				
	Multi-sensors probe allows for the measurement of key parameters including pH, ORP, conductivity, dissolved oxygen, and temperature.				
	The probe transmits readings digitally to the meter, where data points can be displayed and logged.				
	The complete system is simple setup.				
	Backlit graphic LCD Display- features a backlit graphic LCD with on-screen help and the capability to display up to twelve parameters simultaneously.				

	_	_		
The graphic display allows for the use of virtual keys to				
provide for an intuitive user interface				
Waterproof protection-the meter is enclosed in an				
IP67rated waterproof casing and can withstand				
immersion in water at a depth of 1m for up to 30				
minutes. The probe features an IP68 rating for				
continuous immersion in water				
Quick Connect digital Probe-The probe features a				
•				
quick connect DIN connector that makes a waterproof				
connection with the meter.				
Color Coded, Field Replaceable sensors-sensor				
replacement is quick and easy with field replaceable,				
screw-type connectors that are color-coded for easy				
sensor port identification				
Auto-sensor recognition- The probe and meter				
automatically recognize the sensors that are				
connected. Any ports not used on the probe will not				
have the parameter displayed or be configurable				
Automatic temperature compensation-Integrated				
temperature sensor allows for automatic temperature				
compensation of pH, conductivity and dissolved				
oxygen measurements				
Automatic Barometric pressure compensation-The				
meter features a built-in barometer with user selectable				
units for dissolved oxygen pressure compensation				
Standard or quick calibration-Quick calibration				
provides a speedy, single-point calibration for pH,				
conductivity, and dissolved oxygen. Standard pH				
calibration options are available for calibrating up to				
three points from a selection of five standard buffers				
and one custom buffer. Conductivity calibration is a				
single point from six standard selections or one custom				
standard. Dissolved oxygen calibration is up to two				
standard points or a single custom point				
GLP Data- includes a GLP feature that allows users to				
view calibration data and expiration information at the				
touch of a key. Calibration data includes date, time,				
buffers/standards used for calibration, and slope				
characteristics				
Data Logging-Allows users to store up to 45,000				
continuous log-on demand samples with logging				
intervals from one second to three hours				
Intuitive Keypad-The fitted rubber keypad has				
dedicated keys for power, backlight, up/down arrows,				
help and alphanumeric characters. The meter also				
features two virtual soft keys that navigate the user				
through the configuration of each parameter, meter				
setup, and logging of data. The interface is intuitive for				
any user's level of experience.				
Dedicated help key- Contextual help is always				
available through a dedicated "HELP" key. Clear				
tutorial messages and directions are available on-				
screen to quickly guide users through setup and				
calibration. The help information displayed is relative to				
the setting/option being viewed.
