E. Steering

Recirculating Ball and Nut with Power Assist Titing

Water Tank

- * The tank is made of electrically welded 3mm stainless steel material, with a capacity of 500 gallons, with baffled in longitudinal and transverse direction to prevent surge during all driving conditions.
- * The rectangular shape and mounting of the tank is such as to bring the center of the gravity to as low as possible
- * The tank is equipped with a combination of aeration unit
- * The aeration and de aeration arrangement acts as a relief valve to prevent damage to the tank when filled from the pump or hydrant system under pressure

Furnishings

- * Tank to pump feed
- * Pump to tank filling
- * Drain Tap
- * Pump Anti swirl Design: to prevent air from being entrained while pumping
- * Water tank contents level indicator

The Fire Pump

- * 350 to 500 gallons per minute/GPM with a minimum test of 120 PSI and maximum of 180 PSI
- * High pressure self-priming centrifugal type: 2 stage impeller driven by Power Take Off, mid-ship mounted.
- * With automatic vacuum pump
- * 4 discharge valve 2 1/2" NST thread
- * 2 suction valve, 3"
- * provided with cooling system
- * with pump and roll capability

Pump Gauges

- * 1-Compound gauge
- * 5- Pressure gauge
- * water level
